

Rubbermaid Commercial Products  
3124 Valley Avenue  
Winchester, VA 22601

January 13, 2010

All TC/Rubbermaid Commercial Products' faucets comply with California (AB 1953) and Vermont (ACT 193) rules for lead content regulations in non-drinking water plumbing fixtures. Our products are electronic, intended for commercial washroom use, and not intended for the primary use of conveying water for drinking or cooking.

In addition, although our current products comply with the California and Vermont regulations, we support the movement towards lead-free faucets. Therefore, our goal is to uphold our market position as a provider of innovative hygiene solutions by developing faucets with lead content below the current standards.

You can look forward to seeing new products from TC/Rubbermaid Commercial Products in the coming months.

Sincerely,

Jerry McDermott  
Director-Marketing
