Revised: Friday, November 13, 2009

Dear Valued Larsen Customers,

This letter is to keep you informed on the current status of AB-1953(California No Lead Legislation), and your Larsen inventory that could possibly be affected by the law. Larsen will provide all California customers, a purchase history showing affected products your store has purchased in the last year. All salesmen will be required to meet with their customers and explain our policies and procedures for dealing with affected inventory. Any customer not being serviced by a Larsen salesman, can contact our California area manager (Dan Pacho), or myself for the details of your account. The Larsen Supply team is dedicated to our customers business and we will be working with you to insure your compliancy. Larsen will soon have a link on our web site <http://www.lasco.net>, containing up to date no lead product information. This information will be online early next week. It will have an up to date available no lead Larsen product listing, information regarding the law and other items available to help your store to become compliant.

Larsen Supply is changing our direction in the faucet repair category. We have decided that category contains SKU's that need to be compliant. Because of the industry wide last minute changes in this category, much of the product may not be available until late December or even into January. All highlighted categories are in stock and shipping compliant product for most or all of the SKU's contained within the category. If you have questions regarding a specific category or SKU, please contact myself or a team member, or check the web site for information.
