

SAFETY DATA SHEET

1. Identification		
Product identifier	Harvey Silicone Sealant – White or Clear	
Other means of identification		
Product code		
Synonyms	Part Numbers: 031305, 031310, 031311, 031312, 031314, 031315, 031316, 031317, 031318, 031319, 031320, 031321, 031345, 031350, 031351, 031400, 031450	
Recommended use	Sealant for use around tubs, sinks and other plumbing applications.	
Recommended restrictions	Do not us on applications where product will be submerged under water.	
Manufacturer/Importer/Supplier	/Distributor information	
Company Name	William H. Harvey Company	
Address	4334 South 67 th Street	
	Omaha, NE 68117	
Telephone	402-331-1175	
E-mail	info@oatey.com	
Transport Emergency	Chemtrec 1-800-424-9300 (Outside the US 1-703-527-3887)	
Emergency First Aid	1-877-740-5015	
Contact person	MSDS Coordinator	
2. Hazard(s) identification		
Physical hazards	Not Classified.	
Health hazards	Not Classified.	
OSHA defined hazards	Not Classified.	
Label elements		
Hazard symbol	None.	
Signal word	None.	
Hazard statement	This product was determined to be non-hazardous.	
Precautionary statement		
Prevention	Use outdoors or in a well ventilated area.	
Response	Not applicable.	
Storage	Not applicable.	
Disposal	Not applicable.	
Hazard(s) not otherwise classified (HNOC)	None known.	

3. Composition/information on ingredients

Mixtures

Chemical name	CAS number	%
Silicon Dioxide	7631-86-9	5 - 10
Distillates (petroleum), hydrotreated middle	64742-46-7	5 - 10
Titanium Dioxide (White Sealant Only)	13463-67-7	0 – 5
Dimethyl siloxane, hydroxyl terminated	70131-67-8	70 - 90

4. First-aid measures

Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical
	attention if symptoms occur.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get
	medical attention if symptoms occur.

Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Ingestion	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Skin or eye irritation.
Indication of immediate medical attention and special treatment needed.	Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
General information	Note to physician, treat symptomatically.
5. Fire-fighting measures	
5. Fire-fighting measures Suitable extinguishing media	Use dry chemical, CO2, alcohol-resistant foam or water spray (fog).
• •	Use dry chemical, CO2, alcohol-resistant foam or water spray (fog). water jet
Suitable extinguishing media	
Suitable extinguishing media Unsuitable extinguishing media Specific hazards arising from	water jet
Suitable extinguishing media Unsuitable extinguishing media Specific hazards arising from the chemical Special protective equipment	water jet No specific fire or explosion hazard. Fire-fighters should wear appropriate protective equipment and self-contained breathing

General fi	re hazards	None
General fi	re hazards	None

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Methods and materials for containment and cleaning up	Large Spills: Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see section 1 of SDS for emergency contact information and section 13 of SDS for waste disposal. Small Spills: Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container, labeled waste containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see section 1 of SDS for emergency contact information and section 13 of SDS for waste disposal contractor. Note: see section 1 of SDS for emergency contact information and section 13 of SDS for waste disposal.
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
7. Handling and storage	
Precautions for safe handling Conditions for safe storage,	Put on appropriate personal protective equipment (see section 8 of SDS). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures. Store in accordance with local regulations. Store in original container protected from direct
including any incompatibilities	sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10 of SDS) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Occupational exposure limits

US. ACGIH Threshold Limit Values			
Components	Туре	Value	
Petroleum Distillate	TWA	5 mg/m3	
Titanium Dioxide	TWA	10 mg/m3	
US OSHA Permissible Exposure Limits			
Components	Туре	Value	
Petroleum Distillate	TWA	5 mg/m3	
Titanium Dioxide	TWA	15 mg/m3	
Silicone Dioxide	TWA	80 mg/m3	

Biological limit values	No Biological limits.	
Appropriate engineering controls	No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.	
Individual protection measures,	such as personal protective equipment	
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.	
Skin protection		
Hand	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.	
Other	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	
Respiratory protection	Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.	
Thermal hazards	None.	
General hygiene considerations	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	

9. Physical and chemical properties

Appearance	
Physical state	Solid.
Form	Paste
Color	White or translucent.
Odor	Acetic acid/vinegar smell
Odor threshold	Not available.
рН	Not applicable.
Melting point/freezing point	Not applicable.
Initial boiling point and boiling	Not determined
range	
Flash point	> 199 °F (> 93.3 °C)
Upper/lower flammability or explo	sive limits
Flammability limit – lower (%)	Not available
Flammability limit – upper (%)	Not available
Explosive limit - lower (%)	Not available
Explosive limit - upper (%)	Not available
Vapor pressure	Not applicable
Vapor density	Not applicable
Relative density	1.04 – 1.09

Oatey Silicone Sealant White and Clear SDS # Version #: 01 Revision date: Issue date: 12-May-2015

Solubility(ies)	
Solubility (water)	Not available
Partition coefficient	
(n-octanol/water)	Not available
Auto-ignition temperature	Not applicable
Decomposition temperature	Not available
Viscosity	Not available
Other information	
VOC (Weight %)	28 g/L (< 3.0% by weight)

10. Stability and reactivity

Reactivity	Stable under normal conditions.
Chemical stability	The product is stable.
Possibility of hazardous reaction	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	No specific data.
Incompatible materials	No specific data.
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.
44 Table also also al lufa mus	()

11. Toxicological information

Information on	likely routes	of exposure
Inhalation		Aouto

internation on intery realed of e	Apooulo	
Inhalation	Acute Toxicity estimates: > 10 mg/l	
	Exposure time: 4 h	
	Test atmosphere: dust/mist	
	Method: Calculation.	
Skin contact	No known significant effects or critical hazards.	
Eye contact	No known significant effects or critical hazards.	
Ingestion	No known significant effects or critical hazards.	
Symptoms related to the physical, chemical and toxicological characteristics	No specific data.	

Information on likely routes of exposure Acute Toxicity

Addie Texiony			
Components	Species	Results	
Silicone Dioxide			
Acute Oral Toxicity	Rat LD(50)	3,300 mg/kg	
Acute Inhalation Toxicity	Rat LD(50)	2.08 mg/l	
Distillates (petroleum		-	

Skin corrosion/irritation	Not determined.
Serious eye damage/eye irritation	Not determined.
Respiratory or skin sensitization Respiratory sensitization	Not considered a respiratory irritant
Skin sensitization	This product is not expected to cause skin irritation.
Germ cell mutagenicity	No specific data
Carcinogenicity	Sufficient evidence of carcinogenicity in inhalation studies with animals for titanium dioxide exist. However, due to the titanium dioxide being inextricably bound in the silicone matrix, the likelihood of exposure is minimal.
IARC	Titanium Dioxide – 13463-67-7 Group 2B: Possibly carcinogenic to humans.
OSHA	No ingredient of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcino- gen by OSHA.
NTP	No ingredient of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcino- gen by OSHA.
Reproductive toxicity	No known significant effects or critical hazards.

Specific target organ toxicity

Single exposure Repeated exposure Aspiration Hazard

Not Classified. Not Classified. Contains Distillates (petroleum), hydrotreated – Which is a category 1 Aspiration Hazard. The likely hood of aspirating the product in this form is very low due to the high viscosity. Not Classified.

Chronic effects Further information

12. Ecological information

Ecotoxicity

Product/ingredient name	Results	Species	Exposure
Petroleum Distillates			
	Acute LC50 2,900 µg/l Fresh water	Fish - Rainbow trout,Donaldson trout	96 h
	Acute LC50 2,200 µg/l Fresh water	Fish - Bluegill	96 h
Persistence and degradabi	lity Not Available.		

Bio accumulative potential	Not Available.
Mobility in soil	Not available.
Other adverse effects	No known significant effects of critical hazards.

13. Disposal considerations

Disposal instructions	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Local disposal regulations	Not Applicable
Hazardous waste code	Not Applicable
